

Release notes

D-Pile Group 18.1.1.1

20-10-2017

Limitations

MGEOLIB-854 Input files created with versions older than MPile 4.2 (MPile is the predecessor of D-Pile Group) are no longer supported. When you want to read an old file you can use version 16.1 and save it with a different name.

Fixed bugs

MPI-475 Fixed incorrect validation in input screen for soil layers.

Improvements

MGEOLIB-890 In the report, besides the program version that created the report, also the version that made the calculation is displayed.

MPI-327 Improve picture in Pile properties dialog for model Poulos
