

Conditions for Free testing time in the Deltares facilities

Project Goal

These general terms (hereinafter: Terms) form an integral part of all offers by Stichting Deltares (hereinafter: Deltares) to provide user rights to software products and related documentation (hereafter: the Program) and/or related services and apply to all agreements between Deltares and licensees to its software products and/or related services (hereafter: User).

The offer

Deltares will cooperate with SME's offering two of these free of charge concept tests in 2020 with a maximum of one test per SME.

Each effective cooperation¹ between Deltares and SME will consist out of up to a maximum of 80 hours of free basin testing time in one of our experimental facilities to test early design concepts of hydraulic devices and innovations.

The selected facility will be available for ten consecutive working days, starting on Monday and ending on Friday in the second week. This scheduled testing period includes model preparation, construction, disassembling the test set up and cleaning of the facility.

During the testing period, assistance from a model technician and two days of discussion time with a Deltares project engineer for optimization and interpretation of the tests is included in the offer. Raw measurement data or video material that is collected during testing is also included, but the actual data processing and analysis by a Deltares project Engineer is not.

Depending on the selected facility, required instrumentation or model assistance, rates can vary and therefore the offered amount of basin time is flexible, with 80 hours as a reference value. In case cooperation with Deltares research or other SMEs is possible, we aim to optimize the facility usage.

The actual tests will be performed somewhere between October and December 2020. Do keep in mind that Deltares reserves the right to change the basin scheduling and Deltares has the right to cancel or terminate the individual test or the free of charge SBE concept tests in one of Deltares' hydro facilities

Additional costs of the test project, will be taken into consideration at regular rates after consultation between Deltares and the SME company.

Applications

Companies can apply by filling in the form on <https://www.deltares.nl/mkb/>

Applications must be submitted before 15 sept 2020

Which companies and projects qualify?

All small, medium and micro sized businesses (as well as startups) as defined by the European Union are allowed to apply to this offer. (https://ec.europa.eu/growth/smes/business-friendly-environment/sme-definition_en)

The selection procedure will be carried out by Deltares and will be based on several aspects, such

¹ A project is considered to be carried out through effective collaboration where at least two independent parties pursue a common objective based on the division of labour and jointly define its scope, participate in its design, contribute to its implementation and share its financial, technological, scientific and other risks, as well as its results. One or several parties may bear the full costs of the project and thus relieve other parties of its financial risks. The terms and conditions of a collaboration project, in particular as regards contributions to its costs, the sharing of risks and results, the dissemination of results, access to and rules for allocation of IPR, must be concluded prior to the start of the project.

as the fit with the work of Deltares, potential impact on society and feasibility. Please note that Deltares has the final say on which projects are suitable and qualify.

The selection procedure

The selection procedure will be carried out by Deltares and will be based on several aspects, such as the fit with the work of Deltares, potential impact on society and feasibility. Afterwards, Deltares will finalize the selection and the chosen initiatives will be contacted. If your project is accepted, you will receive a collaboration agreement.

Deltares' experimental facilities in the field of hydro research that are according to Deltares most suitable will be used for the testing for each selected SME cooperation initiative.

Please take note: Deltares will bear no responsibility whatsoever for the quality of the test.

Proprietary information

To avoid the free testing to be considered as (forbidden) state aid, it must be agreed in the collaboration agreement that the results of the collaboration which do not give rise to IPR may be widely disseminated and any IPR resulting from the activities of Deltares itself - if any - are fully allocated to us, on the other hand it can be agreed that all information and IPR already in your possession before the test (so called 'Background') will remain your property and can be kept confidential. Feel free to contact us to discuss this important legal feature to avoid misunderstanding.

Further details

Deltares will try to maximize the freedom for the Clients to move around in the basin and the vicinity of the basin. However, it should be noted that Deltares has very strict rules for confidentiality. It will, therefore, be strictly forbidden to leave the assigned area without escort of authorized Deltares staff.

Clients will be welcome on the day(s) of their concept test in the morning (around 8.00 hours) at the Deltares reception and will leave no later than at the end of the working day (around 17.00 hours).

Counterparty's general terms and conditions are explicitly rejected and the Deltares safety rules and regulations will apply and must always be followed. Deltares reserves the right to change the conditions or cancel the Free testing time in the Deltares facilities project without notice.
